

CURB COVID-19 WITH VSC VISIBILITY TOOLS.

Protect your work force, your distribution system and society
with swift and decisive action informed by timely, accurate data.

Hyper-vigilance is key to protecting the people who put themselves at risk to ensure delivery of the essentials needed to sustain society. Now, more than ever, exact and immediate information relating to your staff, visitors and the people they meet, is necessary to guide speedy, focussed reactions that will safeguard our society from the rampant spread of the virus.

VSC's visibility tools allow you to capture and report on all COVID-19 related governance processes electronically. The detailed data you receive, provided in real time, facilitates the fast and targeted action which is vital in our fight against the Corona virus.

Why place emphasis on staff and visitor interaction?

- Staff are at the frontline, connecting with various people per day
- Healthcare systems will be under strain
- Early warning of symptoms will be required
- Targeted, accurate testing and screening is needed

How can using VSC's visibility platforms improve testing and screening accuracy?

- Provides a time-stamped record of all staff surveyed
- Provides historic reporting of staff and visitors
- Automated alerts based on relevant findings

What can organisations do to ensure this traceability is available?

- Ensure all checks and surveys are conducted electronically
- Ensure regular updates of surveyed staff
- Add the Covid-19 symptoms check list
- Discuss these and other additional visibility initiatives, such as electronic access control for staff, visitors and suppliers, with VSC

The provision of accurate information has never before been so time-sensitive or so vital, and VSC is committed to playing our part in slowing the spread of the pandemic.
